

In this set of templates we will work with suppliers and their invoices and their attributes in a table running down the page. To start, we'll work with the invoice listing. Similar to the second example in the supplier section, we can list the invoices down the page in a table. **See sample output on the second page.**

Field Name	Contents	Description
Grp:Invoice	<?for-each:G_INVOICE_NUM?>	Used to loop through the group members of the invoices group
1134922	<?INVOICE_NUM?>	Invoice Number
01-Jan-2007	<?INVOICE_DATE?>	Invoice Date
USD	<?INVOICE_CURRENCY_CODE?>	Invoice Currency Code
01-Jan-2007	<?GL_DATE?>	GL Date
\$100.00	<?ENT_AMT?>	Entered amount
\$100.00	<?ACCT_AMT?>	Accounted Amount
End Invoice	<?end for-each?>	Ends the loop

Repeatable Row Headers

If your invoices break across a page and you want to repeat the column header row, this can be achieved using MSWord's functionality.

1. Highlight the header row
2. Table > Table Properties
3. Under the Row tab select the 'Repeat as Header row at the top of each page'

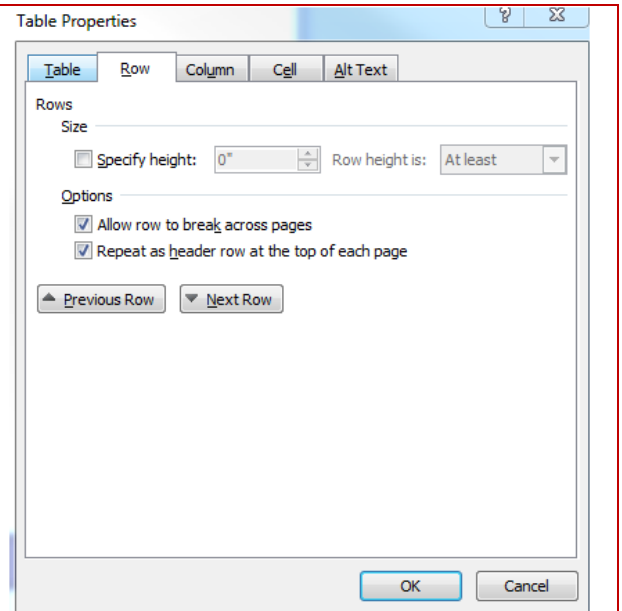

If the invoices table breaks across a page the header row will be repeated.

Splitting Rows across pages

You can prevent rows splitting across a page break by using MSWord's functionality:

1. Highlight the data row
2. Table > Table Properties
3. Under the Row tab deselect the 'Allow row to break across pages'

Rows that would normally be split across two pages are now moved to the second page to preserve the row data.

Invoice Listing

Invoice Number	Invoice Date	Currency	GL Date	Entered Amount	Accounted Amount
Grp:Invoice	1134922	01-Jan-2007	USD	01-Jan-2007	\$100.00
					\$100.00
					End Invoice

Invoice Listing

Invoice Number	Invoice Date	Currency	GL Date	Entered Amount	Accounted Amount
981110	10-NOV-07	EUR	10-NOV-07	\$122.00	\$122.00
